

5. Commercial Office External Landscaping Design + Construct 12//2019)

Client: Mendi Group
 Client Rep: Jeff Doyle
 Role: Principal Contractor
 Contract Value: **\$250,000**

Scope: This Design and Construct Project provided finishing touches to Mendi's Commercial office refurbishment completed in December 2019. **Transcape** responded to the Client's brief by providing an impressive, modern, yet functional, low maintenance external landscaped space that incorporates and showcases a selection Mendi's raw material obtained from their own local quarries and utilises plants provided by our affiliated company; **Rocky Springs Nursery**

Mendi sought a design solution that utilised and showcased their own raw materials and upon completion, would provide a "live catalogue" of raw materials that could be viewed by Mendi's clients and visitors insitu – inspiring countless landscape and pavement ideas, uses and options

This project represents a perfect balance of hard and soft scape landscaping elements executed by our qualified team. One of the key features of this project incorporated the skilled labour of our team to manually create the stone walls and a central planter. This task involved the careful selection of suitably sized rocks (supplied by Mendi's quarry) embedded in mortar to create a rustic/traditional garden edge
